

Annual Production Sale **Monday, March 29, 2021**

1:00 p.m. (MST)

Sterling Livestock Commission
Sterling, Colorado

Offering

67 Yearling Registered Red Angus Bulls

18 Registered Red Angus Heifers

43 Commercial Red Angus Heifers

DVAuction
Broadcasting Real-Time Auctions

www.axtellcattlecompany.com

WELCOME!

We would like to welcome you to the annual Axtell Cattle Company bull and female sale.

This set of bulls has been through test after test this past year. The Covid pandemic did not affect the cattle, but everything else did. We felt this was the best set of calves we had ever had at turnout, but a brutal, dry summer took the shine off of some, poor quality feed took the shine off a few more and what we have left is a tough, battle hardened group that has withstood the drought and heat, weaned remarkably well and grew well this winter. Are they the biggest set we've had, probably not, but I feel they are sound in structure, in good condition and ready to go out and breed a bunch of cows. There is not a lot of variation in this group, we feel we have a strong offering from the first to last bull.

We feel the quality of the registered heifers is good. They fought through the same challenges as the bulls, but did it with lower quality hay. They will be in a little greener condition than last year, but a little green grass and they will pop. We've got daughters of some of our top cows in the group this year. The commercial heifers will be from two customers. One group will be January calves with extra growth. These are the heifers that have topped our sale every year, the other group will be April born heifers that will be more moderate in frame. Both groups of heifers will be great assets to commercial herds in the area.

Be sure to check out videos of all the bulls and heifers online at DVAuction.com. Keep in mind that they will have matured another month from the date of the videos.

We invite you to stop by anytime to see the bulls and heifers, our herd sires or cowherd. Just call ahead to set up a time and get directions. The sale offering will be available for viewing at the sale location on the afternoon of March 28th.

We look forward to seeing you sale day, but if you are unable to attend and wish to bid just contact us, the sale representatives or pre-register on dvauction.com a couple days prior to the sale. You are able to bid live on DVAuction or leave proxy bids on lots you may be interested in.

Please let us know if we can be of any assistance to you in the buying process. We love to talk about cattle and would be glad to visit with you anytime. I will shoot it to you straight on any lots you may have interest in. Our goal is to have the right animals with the right buyers. We have years of experience with these cattle and if we know what you are looking for, we can assist you in getting the correct animals for your environment and management. Also be sure to follow our facebook page and website for more details. Hope to see you March 29th.

The Axtell Family
Brian, Jamie Jo and Clay

Axtell Cattle Company PRODUCTION SALE

Monday, March 29

1:00 p.m. (MST)

Sterling Livestock Commission

20197 Riverside Drive

Sterling, Colorado 80751

Sale Day Phone Numbers:

Sterling Livestock Commission 970.522.1950

Brian Axtell - 970.554.1132

Jamie Jo Axtell - 970.554.1680

Sale Representatives:

Sterling Livestock: Jason Santomaso 970.520.3049

DVAuction: Ty Groshans 970.818.6016

Red Angus Association: Nolan Woodruff 805.861.0996

The Fence Post: Drew Feller 402.841.4215

Inspection of Cattle: All bulls and registered heifers can be viewed at the ranch near Anton. Please call to set up an appointment and obtain directions. All sale animals will be available for preview at the sale location on the afternoon of March 28th.

Health: Health papers can be furnished for cattle to be shipped out of state. All bulls are tested negative for BVD and have passed a fertility test.

Delivery: Free delivery up to 250 miles is available on bulls and registered heifers. Other arrangements can be made on an individual basis, please call prior to sale. **NO DELIVERY IS AVAILABLE ON COMMERCIAL HEIFERS.**

Possession: Bulls can be taken after purchase or we will care for the bulls until April 15th, free of charge.

Guarantee: All bulls have passed fertility tests. All bulls will be guaranteed sound for the first breeding season (until Sept 1, 2021); however, the seller will not be held responsible for mistreatment or mismanagement. If a suitable replacement is available he will be furnished—OR— a credit toward a purchase in next years sale if a suitable replacement is not available.

Sale Order: Commercial heifers will start the sale, followed by bulls and registered heifers in catalog order.

Semen Interest: Axtell Cattle is retaining a 1/3 revenue sharing semen interest in all bulls selling. Buyer will retain all salvage value of bull.

EPD Updates: Please note that EPD's are now recalculated weekly. Data in the catalog is from the last week of February.

Liability Statement: All persons attend this sale at their own risk. Neither Axtell Cattle Company or any other person connected with the management of the sale assumes any liability, legal or otherwise.

Lunch: Please join us before the sale for a complimentary lunch served in the salebarn café just upstairs from the salering and office.

Brian and Jamie Jo Axtell

We purchased Knock Out as the 3rd high seller at the 2017 SSS sale in Canada. We've been very happy with the type he stamps on his calves, the big rib eyes and muscle that he throws. His daughters have done a good job and we are very happy with what he's done for our herd.

Dominor 4124 was our all time high selling bull to Feiring Angus Ranch in North Dakota. We bought him back as an aged bull and really like his consistent calving ease, the depth of body he throws and the beautiful udders of his daughters.

6249 consistently sires dark red calves with loads of capacity and thickness. He is a very moderate bull, but still packs on the pounds and is extremely easy fleshing. His sons are my pick for my ideal type.

Epic 511 was retained as a heifer bull due to his good feet and the extremely good udder quality of his dam. He wasn't as powerful of a bull as our others, but was correct and sound and did what we hoped he would do.

His picture says it all. Moderate, full of muscle and very long bodied. He looks just as good in person. We expect his daughters to be his strong point, but his bull calves more than held their own.

We kept 8935 for multiple reasons. The first reason was we felt he had by far the best feet of our bull crop, 2nd was the fact that we wanted to spread his dams genetics throughout the herd. She is hands down the best cow we've had for maternal instincts. He was also a darn nice looking bull with a little more frame size and length.

7765 is an outcross to most lines and combines Ohlde and Beeby breeding, two master breeders. He is moderate, very deep ribbed and an aggressive breeder. His first daughters look outstanding.

COMMERCIAL HEIFERS

This year we are offering a few groups of commercial replacement heifers. These heifers are owned and raised by Steve and Matt Kalous from Brush, Colorado and Lucas and Maureen Beek of Cheyenne Wells, Colorado. The heifers will come into the ring in small groups, sorted by weight and type. The buyer will buy the group in the ring or has the option of taking the entire lot as well. We would allow a young person to pull one heifer out if they are wanting to find a show heifer. We believe this is a great group of red females that will make their new owners proud. The commercial heifers will **START the sale at 1:00 P.M.** so be ready for these outstanding females!

Lot A: 25 Head - Steve and Matt Kalous – Brush, CO Steve (970) 768-2451

Steve and Matt Kalous are offering 25 head of replacement heifers. These heifers are born in January and February and are out of a high performance / maternal cattle herd. They will have extra size and weight and will make top cows. They are sired by Axtell Emperor 4229 #1703367 our second high selling bull of all time, Axtell Dominator 5830 #3478145 the third high selling bull in 2016, Axtell Redwing 7106 #3817937, our second high seller in 2018, and Axtell Red Knight 8370, our second high seller in 2019. They buy the good ones and it is evident in the quality of their cattle. If you want to tie into top genetics, look at these girls. I would call this group, one of the best sets of cattle to sell in the state this spring. These heifers are weighing in the 850 lb. range, but are moderate framed and backed by generations of similar type. Please call Steve to discuss these heifers. He has documented carcass data on their steer mates that will make you salivate. Just an outstanding group of heifers!

Lot B: 18 Head - Beek Family – Cheyenne Wells, CO Lucas (719) 342-1005 or Maureen (719) 342-2969

The Beek family – Lucas and Maureen Beek are offering 18 head of replacement heifers.

These heifers are born in April and are from a maternal cattle herd that doesn't pamper their cattle. These cattle will know how to go out and work for a living. They are sired by Axtell and Kravig Red Angus bulls. They will be a nice set of cattle from a really good family that has a passion for good cattle. The Beek's also have a beef business, so contact them for that as well. I went through their replacements last year and was impressed with the quality of the cattle. These heifers are weighing in the 650-700 lb. range, are moderate framed and backed by a hard working cow herd. Please call Lucas or Maureen to discuss these heifers.

Please note that **NO DELIVERY** will be available on commercial heifers.

Pictured are the 2018 consignment by Steve and Matt Kalous. For this year's consignments, check out videos on [DVAuction.com](https://www.dvauction.com)

We start off the sale with a bull that will make outstanding daughters. He is very moderate, very thick and deep and is backed by one of the very best cows on the ranch. The first Knock Out daughters are impressive and this is my pick to produce the best cows in the sale. We debated keeping him for ourselves.

Here is another cowmaker sired by Max and out of the easiest keeping cow on the ranch. He will add pounds, be easy calving and produce great females. Another bull we nearly kept to increase the influence of his sire.

Lot 4 ranked #1 at weaning and #2 at yearling. He's been a standout from birth. He will throw all kinds of performance and will have calves with a good "type". He was the rare bull here that got a special name and it fits. Just a big, growthy cowman bull. His dam sold as one of our top cows to Hanger Red Angus in Kansas.

Lot 5 is our highest gaining bull this year, and he's out of a heifer. He is a little bigger framed, but most of the weight comes from being longer bodied than the rest. He is also our #1 Rib Eye bull. A true heifer bull that will not take a back seat to anyone on performance. The kind to put on the heifers for a couple years, then switch to your best cows later in life.

Another long bodied bull out of a real good cow. Use him on heifers, keep all the daughters and he's good enough to move to the cows later in life. He's a bull that covers all the bases well, from calving ease, maternal and growth. Just a nicely balanced bull. His dam now resides at Little Cedar Beef in Iowa.

We don't keep a black one unless he's good and this one is as good of a bull as we have. He's absolutely loaded with muscle, has great feet, is deep bodied and can be used on heifers. He is red gene carrier from the heaviest muscled bull we've ever raised and an excellent Ohlde bred cow. **RED CARRIER**

[illegible]

0316 is backed by a high producing cow that is moderate and deep. Lot 12 is built the same way and grew well along the way. He would be a good one to keep some daughters out of and his steers will be in you "big" group. He has good carcass data as well if you feed them out. This bull covers a lot of bases.

This is a real nice, small headed, smooth haired, deep red bull. He is built for calving ease through his head and shoulders, but still has a lot of eye appeal and is a real nice bull. His dam and grand dam have been real nice cows for us. He's in the top 1% for HB. To me, he's a sleeper, a real nice bull!

Lot 19 is a growthy Ajax out of a standout Ohlde cow. A little more frame and stretch than some. Should be a good cow maker bull with good performance.

Here is an easy going growth bull that I like. He's long bodied with good depth and excellent performance. Excellent bull to retain ownership in his calves. His brother last year sold to Stan Rennard in Wyoming.

Lot 21 is a bigger framed high growth calving ease bull. You may look at his head and wonder, but it wasn't big when he was born. If he scares you because of that, no worries as he was one of the high gainers in the pen and can be used on the cows. His dam produced 7215, one of our herd sires and 0415 at Shuman Red Angus in Oregon. She's an outstanding cow that has stood the test of time.

040 is a thick bull that is long and deep bodied. He's a definite bull to keep heifers from. He ranks in the top 2% of the breed for stayability. His dam is still in production and is a top cow and the great great grand dam of the Lot 23 bull. Our Amber cow family is probably my favorite, they are all deep, wide and have a perfect udder. This bull will produce those kind!

Here is a very deep and thick made bull. Is he for everybody? No, but if you need to reduce frame, add thickness and depth and have a bull backed by as good a cow as we own, he will do the trick. If you are tired of flat sided, big framed cattle he will fix that in one generation.

Lot 25 is smaller framed, extremely deep bodied with a nice level top and built to take tall, flat sided cows and make them into smaller framed, thick, easy doing cows with excellent udders. He's an excellent calving ease bull and his dam and grand dam are the type to stay fat no matter the conditions. We are retaining a brother to his dam. We think a lot of the cows behind this bull.

A good Red Knight son from a big, powerful cow we bought in the Hall-Pokorny dispersal a few years back. He's typical of the Red Knight cattle, he is moderate, deep bodied and this one has a little more length. He should produce both big steers and nice heifers.

This bull is one I've liked all winter. He has breed character, is thick, moderate and deep bodied and should make nice females. His dam sold in our cow sale to Norman Miller family in Kansas. His sire was a calving ease bull with excellent feet and his dam had as good of an udder as we've seen. Keep the daughters.

Excellent heifer bull that is smooth shouldered. He had ratios of 116 for both Marbling and ribeye. His dam produced our all time high REA a few years back and sold to Namken Red Angus in South Dakota to be a donor cow. We considered keeping him for a heifer bull due to his outstanding dam.

This Red Knight can be used on heifers or cows. He is a chunk, very deep and wide bodied. He's backed by calving ease and easy fleshing genetics. I'm a big fan of his dam and she goes back to the great 503 cow at Sheaman Red Angus. This is one I've liked from day one!

This one has a little more frame size. He will make a good range bull that will make good females. His dam is from Koenig Red Angus in Montana. Those cattle have worked well for us. He is a complete outcross to most of our cattle and would work well as an outcross if you use a lot of our bulls.

We didn't put him down as a heifer bull, but in a well managed herd, he should be fine on heifers. His sire was used for multiple years with very few issues. A long bodied bull with good marbling and the grand dam was a top producer and this bull's dam is well on her way to doing the same.

Lot 41 is long bodied and dark red. He is full of meat, and good quality meat at that! He had a great 140 Ratio for Marbling and had a 114 Ratio for REA. It is rare to combine such high ratios on these traits. The grand dam is now a Donor at Namken Red Angus and she was one of my favorite cows. Use him to sell on the grid and keep the daughters.

The youngest bull in the sale. We don't keep many April born bulls but we did on this one. He's a narrow shouldered heifer bull going back to our top producing Amber cow family. His dam is a maternal sister to the Lot 1. He is younger and therefore smaller, but he is a bull that with a lot of genetic potential.

When you see him, you will think a decent bull, nothing more, but his calves will be ones that will flat grow and his daughters will milk. His weights were merely average, but his dam has been a great cow here, but when cows hit ten years old, milk hard with basically no grass, their calves don't unlock their full genetic potential. He's a sleeper.

This moderate framed bull is very long bodied and big ribbed. He has a nice level top and a good mother. Use him to produce top selling replacement heifers or keep them, as they should have longevity bred in.

Here is an AJAX son from the old 935 cow. She was a great cow for maternal instincts and raising a big calf. She never missed and raised herd sire Axtell Endorse 8935. There are prettier bulls in the sale and bulls with better numbers, but I'm not sure there's one that will make better range cows that know how to do their job.

A good, moderate heifer bull with loads of capacity, just like his mother. This bull will produce very easy fleshing cattle. The grand dam is the dam of Axtell Dominor 4124, who is one of only two cows we've flushed.

Lot 66

REGISTERED HEIFERS

We will be bringing the heifers into the ring in groups of two. You will have the option of purchasing one heifer or both, your choice. The heifers in the offering are right out of the replacement pen including some from the very top.

These heifers are green and are coming off of a drought year so they are not big, fat heifers. They are raised right along with our other heifers and should mature into 1,000-1,100 lb. bred heifers. They will grow well once they hit green grass. We feel that over feeding young heifers is detrimental to their potential milking ability and structure. We've included some of our top growth heifers and some of the more moderate heifers in an attempt to have something for different tastes in cattle.

This heifer is a maternal sister to last years \$3,900 high selling heifer to Colby Sires and his up and coming herd in Campo, Colorado. This heifer is the one with the most growth in our entire replacement pen. An added bonus is she's the first daughter to sell from a 8935, who we have big hopes for as a premium maternal sire. She ranks in the top of the breed for HB and STAY.

A nice Max granddaughter from a truly outstanding producing cow. She will be a good heifer. The dam's udder is fine, it is not a problem udder and never will be, but at 9 years of age, it is more of a "run of the mill" udder, not perfect, but plenty good enough. The sire should help on this as well.

Another Blockanna heifer. A maternal brother to this heifer went to Arrowsmith Red Angus. This heifer should have good performing calves due to her dam. I expect this heifer to milk well.

A huge THANK YOU to Brian's parents,
Vaughn and Joyce Axtell
for everything you do for
Axtell Cattle Company!

Red Angus Guide to EPDS and Indexes

ProS ... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
