

Annual Production Sale **Monday, March 25, 2024**

1:00 p.m. (MST)

Sterling Livestock Commission
Sterling, Colorado

Offering

69 Yearling Red Angus Bulls
20 Registered Red Angus Heifers
30 Commercial Red Angus Heifers

This sale will be broadcast live on the Internet.

DVAuction
Broadcasting Real-Time Auctions
Real time bidding & proxy bidding available.

WELCOME!

We would like to welcome you to the annual Axtell Cattle Company bull and female sale.

Times are good in the cattle industry. Calf prices are at record highs and this is a good time to invest in the future of your herd with bulls that will improve your cow herd. This set of bulls is one that we are very proud of. They weaned incredibly well with basically no sickness and took off growing. I feel there are many bulls in the offering that have the quality to be herd sires in registered herds. The quality runs deep on this group of bulls! This group of bulls will be in working condition, they have a little less fat on them compared to last year. With the milder winter this year, we backed off on feed slightly to keep them in good, but not over fat condition.

We feel the quality of the registered heifers is excellent. As a whole, this is a very feminine group of heifers. We've included heifers from all of our sire lines including our new sires. We have growthy heifers and more moderate, calving ease type heifers. We wanted to include many varying types so there is one for everyone.

The commercial heifers will be from two customers. One group will be January calves with extra growth. These are the heifers that have topped our sale every year, the other group will be early April born heifers that will be more moderate in frame with excellent quality. Both groups of heifers will be great assets to commercial herds in the area. Be sure to check out videos of all the bulls and heifers online at DVAuction.com. Keep in mind that they will have matured another month from the date of the videos.

We invite you to stop by anytime to see the bulls and heifers, our herd sires or cowherd. Just call ahead to set up a time and get directions. The sale offering will be available for viewing at the sale location on the afternoon of March 24th. We look forward to seeing you sale day, but if you are unable to attend and wish to bid just contact us, the sale representatives or pre-register on dvauction.com a couple days prior to the sale. You are able to bid live on [DVAuction](http://DVAuction.com) or leave proxy bids on lots you may be interested in. The sale will also be on CattleUSA.com as well.

Please let us know if we can be of any assistance to you in the buying process. We love to talk about cattle and would be glad to visit with you anytime. I will shoot it to you straight on any lots you may have interest in. Our goal is to have the right animals with the right buyers. We have years of experience with these cattle and if we know what you are looking for, we can assist you in getting the correct animals for your environment and management. Also be sure to follow our Facebook page and website for more details. Hope to see you March 25th!

The Axtell Family
Brian, Jamie Jo and Clay

Axtell Cattle Company PRODUCTION SALE

Monday, March 25

1:00 p.m. (MST)

Sterling Livestock Commission

20197 Riverside Drive

Sterling, Colorado 80751

Sale Day Phone Numbers:

Sterling Livestock Commission 970.522.1950

Brian Axtell - 970.554.1132

Jamie Jo Axtell - 970.554.1680

Sale Representatives:

Jason Santomaso, Sterling Livestock 970.520.3049

Cody Nye, The Fence Post/TSLN 308.760.8588

Katie Martin, Red Angus Association

Inspection of Cattle: All bulls and registered heifers can be viewed at the ranch near Anton. Please call to set up an appointment and obtain directions. All sale animals will be available for preview at the sale location on the afternoon of March 24th.

Health: Health papers can be furnished for cattle to be shipped out of state. All bulls have passed a breeding soundness exam.

Delivery: Free delivery up to 250 miles offered for bulls and registered heifers. Free nationwide delivery for purchases totaling over \$10,000. **NO DELIVERY IS AVAILABLE ON COMMERCIAL HEIFERS.**

Possession: Bulls can be taken after purchase or we will care for the bulls until April 15th, free of charge.

Guarantee: All bulls have passed fertility tests. All bulls will be guaranteed sound for the first breeding season (until Sept 1, 2024); however, the seller will not be held responsible for mistreatment or mismanagement. If a suitable replacement is available he will be furnished—OR— a credit toward a purchase in next years sale if a suitable replacement is not available.

Sale Order: Commercial heifers will start the sale, followed by bulls and registered heifers in catalog order.

Semen Interest: Axtell Cattle is retaining a 1/3 revenue sharing semen interest in all bulls selling. Buyer will retain all salvage value of bull.

EPD Updates: Please note that EPD's are now recalculated weekly. Data in the catalog is from the end of February.

Genomic Testing: All registered bulls have been sire verified and genomic tested using the GGPLD 100k. This level of accuracy is equivalent to 15-20 progeny records.

Liability Statement: All persons attend this sale at their own risk. Neither Axtell Cattle Company or any other person connected with the management of the sale assumes any liability, legal or otherwise.

Lunch: Please join us before the sale for a complimentary lunch served in the salebarn café upstairs from the salering and office.

Real time bidding & proxy bidding available.

From E. Chestnut Street, turn north onto Cucarola Road (watch for Fleming Auto Sales on the corner). Cucarola will dead end at the salebarn facility, turn back west to find parking in front of the salebarn or across the road.

EN AXTELL ENDORSE 8935

8935 is one of the very top maternal bulls in the breed. He was kept due to good growth, excellent feet and the top maternal instincts of his dam.

Due to injury, this is our last calf crop from Widescreen.

He is probably more my type of bull than any bull we've ever used.

When I saw him at Arrowsmith's I knew we had to own him. He's done an excellent job and we are happy to have more calves from his son, Axtell Widescreen 2032 next year. We are very high on this blood line!

Maximus has surprised us with the growth and length that he has sired.

His dam is very moderate and easy fleshing and one of our best cows. We thought Max 159Y was one of the best bulls we've seen, but Maximus 0514 has been a lot more consistent and done a much better job in our herd.

El Chapo's maternal numbers do not look great but that is due to being from a lot of Canadian and Black genetics...They get hammered in the US system!

His dam is one of the very best cows I've seen, and the type of calves 2077 has produced lead me to believe that he will have great maternal numbers when all is said and done. I love the Angus type that he throws.

J105 was purchased from C&C Duvall Ranches in Granada Colorado.

He was extremely easy calving with calves with a nice type. We liked that he incorporated the Buf Crk Amber cow family into our herd.

RED SSS KNOCK OUT 661B

LASTING LEGACY

RED SSS KNOCK OUT 661B

was retired this year.

He has been a great sire for us for many years. His legacy will live on with many excellent daughters in the herd plus we retained his son, Axtell TKO 2418.

Semen is also still available.

AXTELL TKO 2418

COMMERCIAL HEIFERS

This year we are offering a group of commercial replacement heifers. These heifers are owned and raised by Steve and Matt Kalous from Brush, Colorado and Lucas and Maureen Beek from Cheyenne Wells, Colorado.

Each lot of heifers will come into the ring in small groups, sorted by weight and type. The buyer will buy the group in the ring or has the option of taking the whole lot. We would allow a young person to pull one heifer out if they are wanting to find a show heifer.

We believe this is a great group of commercial females that will make their new owners proud. The commercial heifers will START the sale at 1:00 P.M. so be ready for these outstanding females!

LOT A: Steve and Matt Kalous – Brush, CO (970) 768-2451

Steve and Matt are offering 15 head of replacement heifers.

12 head of straight Red Angus and 3 Char x Red Angus

These heifers are born in January and February and are out of a high performance / maternal cattle herd. They will have extra size and weight and will make top cows. They are sired many past sale toppers from our herd. They will be mostly by Flying K Max, Red Knight, Dominator and Redwing sons. The Charolais are sired by Axtell Milestone 1536 (WC Milestone x LT Rushmore) They buy the good ones and it is evident in the quality of their cattle. If you want to tie into top genetics, look at these girls. I would call this group, one of the best sets of cattle to sell in the state this spring. These heifers are weighing in the 850 lb. range, but are moderate framed and backed by generations of similar type. Please call Steve to discuss these heifers. He has documented carcass data on their steer mates that will make your mouth water. Just an outstanding group of heifers! The Char x heifers will sell as a separate group.

LOT B: Beek Family – Cheyenne Wells, CO Lucas (719) 342-1005 or Maureen (719) 342-2969

The Beek family – Lucas and Maureen Beek are offering 15 head of replacement heifers.

These heifers are born in April and are from a maternal cattle herd that doesn't pamper their cattle. These cattle will know how to go out and work for a living. These heifers are all April born heifers and will really pop when they get out on grass. They are sired by Axtell and Kravig Red Angus bulls. They will be a nice set of cattle from a really good family that has a passion for good cattle. The Beek's also have a beef business, so contact them for that as well. These heifers are weighing in the 675-725 lb. range, are moderate framed and backed by a hard working cow herd. These heifers have been utilizing crop residue and are ready to breed. Please call Lucas or Maureen to discuss these heifers.

Please note that **NO DELIVERY** will be available on commercial heifers.

Pictured are the 2018 consignment by Steve and Matt Kalous. For this year's consignments, check out videos on DVAuction.com

Lot 3

Lot 3 is super long and deep bodied. He is wide and deep like his outstanding dam. She is from our best cow family, and I would call her the best cow of the group. She has produced a high selling bull to Karl and Ginger Wright that we kept semen on. He will be a cowmaker bull, he will produce the right kind!

3809 just gets better every day. He is loaded with rib shape and muscle in a moderate package. He's possibly the heaviest muscled bull in the sale. His EPD's indicate he could be a heifer bull but I would see how he does on the cows the first year. He is in the top 1% for HB and STAY!

Lot 5 is an excellent Dominor son that is very smooth and long. He's built for calving ease but also has growth numbers to be used on the cows. His dam is one of our top young cows, she is ideal in her type and production.

I really like the type of this bull, dark red, moderate and thick, the epitome of how I like bulls to look like and backed by an old cow with a proven pedigree. If he would have been a little bigger SC, he would have stayed here. An excellent heifer bull with elite cow making genetics.

3505 is an excellent El Chapo son. El Chapo has Canadian and Black genetics, which don't translate well to Red Angus EPD's. I think they will make outstanding cows, I felt his dam, 23F, was the best cow in the Duff herd. Lot 10 has a beautiful dam as well. Use this bull to make a fancy set of cows.

This bull is a big framed bull with a ton of performance from weaning to yearling. We don't feed for gains like he had and his EPD's indicate that he's in the top 1% of the breed for YW. I will say that that is the first term we've bred a bull in the top 1% of YW. I would recommend him as a terminal bull to produce those big calves in the fall.

HEIFER BULL

Here is a nice heifer bull. He's got good calving ease, growth, length and is very smooth made. He goes back to a great line of cows on both sides, he's in the top 1% of the breed for STAY and HB. He's a great heifer bull prospect.

Here is one of my favorites. He's a smaller framed bull, but he's deep, thick and wide. He has a small calving ease head and is very clean made. His dam is always fat with a perfect udder. His grand dam is a donor for Namken Red Angus.

If you are looking for a calving ease bull that will keep cow size and inputs under control, he's a great choice.

Here's a bull with a little more frame, good growth and still moderate at birth.

His dam has proved to be a good cow and is from a great cow family.

Lot 33 is a well put together, moderate heifer bull.

He's easy to get along with and is backed by a good young cow.

He is linebred Dominor to lock in the calving ease.

He should produce excellent daughters.

Lot 38 is just an April born bull but has kept up well with his older brothers.

He shares the same grand dam, Rose T747 with Lot's 11, 12 and 51.

All three cows are great producers and loaded with capacity. Lot 38 should produce the same kind of females. He could work on heifers, but I'd prefer to see how he does on cows the first year.

Lot 45 is backed by a very good dam, who had our Lot 1 bull on her first calf. This bull has a little more growth and extension. He gained well and should pass on good growth traits. I debated about calling him a heifer bull. I'd probably wait a year and see how his calves are, but he could possibly be a heifer bull.

He is a performance type bull, his daughters will likely be too big for my taste, but he should produce big framed, high growth calves. His dam is a big cow with a lot of performance.

All registered bulls have been sire verified and genomic tested using GGP-LD (100k). This level of accuracy is equivalent to 15-20 progeny records.

REGISTERED HEIFERS

We will be bringing the heifers into the ring in groups of two. You will have the option of purchasing one heifer or both, your choice.

The heifers in the offering are right out of the replacement pen including some from the very top. They are not big, fat heifers, but are in good condition to go to work for you. They will grow well once they hit green grass. They are raised right along with our other heifers and should mature into 1,000 lb. bred heifers. We feel that over feeding young heifers is detrimental to their potential milking ability and structure.

We've included some of our top growth heifers and some of the more moderate heifers in an attempt to have something for different tastes in cattle. There are quite a few heifers in this offering that I really don't want to part with, but we only have so many spots.

This very low BW heifer goes back to the high selling bull in the Flying K sale in
Canada and the 333 cow that had a flawless udder. She will make a good cow.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

His influence is still seen in the females
of our herd. Watch for him in pedigrees
throughout the sale.

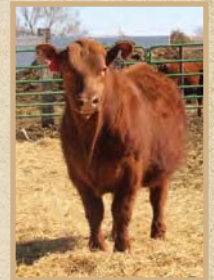

PHOTO GALLERY

After a brutal winter last year, we had an unusually wet spring. Green grass was definitely a welcome sight after the long winter but fencing creek crossings became a full time job.

We had bitter cold in January but an otherwise mild winter. What a difference a year makes!

Clay plays 6-man football for his school, Arickaree. Arickaree doesn't offer baseball so he travels to Akron in the spring to play as an Akron Ram. Last year, Akron won their regional baseball tournament and went on to state. Clay is excited for this year's season!
