

AXTELL CATTLE COMPANY

Annual Production Sale

Monday, March 30, 2026

1:00 p.m. (MST)

Sterling Livestock Commission
Sterling, Colorado

This sale will be broadcast live on the internet.

DVAuction
Broadcasting Real-Time Auctions

Real time bidding & proxy bidding available.

WELCOME!

We would like to welcome you to the annual Axtell Cattle Company bull and female sale.

Times are good in the cattle industry. Calf prices are at record highs and this is a great time to invest in the future of your herd with bulls that will improve your cow herd. This set of bulls is one that we are very proud of. They weaned incredibly well with basically no sickness and took off growing. We had great grass and bigger weaning weights and a very nice winter so far. It's amazing what these cattle can do when the environment cooperates a little. The quality runs deep on this group of bulls! This group of bulls will be in working condition and will weigh a little more than previous years. We shoot for a 2.5 lb/day gain and these bulls exceeded that even with less feed than normal.

We went on a nationwide search for new sires that fit what we want to do and found some excellent new blood for our herd. We feel these bulls have fit what we want to do and will have a lasting impact on our herd and yours. The bulls we added will add volume, calving ease and are out of very good cows. We didn't pick them for their numbers, but for their quality.

The commercial heifers will be from three customers and will include a nice group of first calf heifer pairs in addition to the open heifers. One group will be January calves with extra growth. These are the heifers that have topped our sale nearly every year. The other group will be April born heifers that will be more moderate in frame with excellent quality. Both groups of heifers will be great assets to commercial herds in the area. The pairs are from reputation genetics, have Axtell sired calves at side and are ready for grass.

We invite you to stop by anytime to see the bulls, our herd sires or cowherd. Just call ahead to set up a time and get directions. The sale offering will be available for viewing at the sale location on the afternoon of March 29th. We look forward to seeing you sale day, but if you are unable to attend and wish to bid just contact us, the sale representatives or pre-register on dvauction.com a couple days prior to the sale. You are able to bid live on [DVAuction](http://DVAuction.com) or leave proxy bids on lots you may be interested in. The sale will also be on CattleUSA.com as well.

Please let us know if we can be of any assistance to you in the buying process. We love to talk about cattle and would be glad to visit with you anytime. I will shoot it to you straight on any lots you may have interest in. Our goal is to have the right animals with the right buyers. We have years of experience with these cattle and if we know what you are looking for, we can assist you in getting the correct animals for your environment and management. Also be sure to follow our Facebook page and website for more details. Hope to see you March 30th!

The Axtell Family

Facebook: Axtell Cattle Company

Inspection of Cattle: All bulls can be viewed at the ranch near Anton. Please call to set up an appointment and obtain directions. All sale animals will be available for preview at the sale location on the afternoon of March 29th.

Health: Health papers can be furnished for cattle to be shipped out of state. All bulls have passed a breeding soundness exam and trich test.

Delivery: Free delivery up to 250 miles offered for bulls and registered heifers. Free nationwide delivery for purchases totaling over \$10,000. **NO DELIVERY IS AVAILABLE ON COMMERCIAL HEIFERS.**

Possession: Bulls can be taken after purchase or we will care for the bulls until April 15th, free of charge.

Guarantee: All bulls have passed fertility tests. All bulls will be guaranteed sound for the first breeding season (until Sept 1, 2026); however, the seller will not be held responsible for mistreatment or mismanagement. If a suitable replacement is available he will be furnished—OR— a credit toward a purchase in next years sale if a suitable replacement is not available.

Sale Order: Bulls will start the sale, followed by commercial heifers and pairs. All lots sell in catalog order.

Semen Interest: Axtell Cattle is retaining a 1/3 revenue sharing semen interest in all bulls selling. Buyer will retain all salvage value of bull.

EPD Updates: Please note that EPD's are now recalculated weekly. Data in the catalog is from the end of February.

Genomic Testing: All registered bulls have been sire verified and genomic tested using the GGPLD 100k. This level of accuracy is equivalent to 15-20 progeny records.

Liability Statement: All persons attend this sale at their own risk. Neither Axtell Cattle Company or any other person connected with the management of the sale assumes any liability, legal or otherwise.

Lunch: Please join us before the sale for a complimentary lunch served in the salebarn café upstairs from the salering and office.

Absentee Bidding: Anyone wishing to bid who cannot attend the sale may place bids by contacting us or the sale representatives listed. Internet bidding is also available through DVAuction.com and CATTLEUSA.com. Online bidding requires pre-registration prior to the sale.

This sale will be broadcast live on the internet.

CATTLE USA.com

We purchased Craftsman as the all time high seller at the Flat Water Gang Sale in Nebraska. 5L Craftsman is widely known to make fantastic daughters and has a great pedigree and is very rare. We bought this son out of a top Sandbur Ridge donor cow to give us a great calving ease and maternal bull. His first calf crop has not disappointed and many of his sons are standouts, but we are most excited to get his daughters into production.

We purchased Boxer with Select Sires Argentina. This is his first calf crop for us, but he's got calves all over South America. We bought him for his type. He was very moderate, very deep and long bodied with good feet, excellent breed character, dark red color and great attitude. We've been pleased with his calves, some are carbon copies and some are even better

Widescreen was kept as a replacement for his sire and the fact that he was out of one of our top cows at the time with excellent production, udder and fertility. He can add a little frame, is easy calving and nearly always adds style and weight in an attractive package. He's a bull that covers all the bases.

We used TKO on heifers this past year. He stamps his calves with his distinctive, heavy muscled look with style. He is a very easy calving bull that reduces frame, BW and adds a great look. His first daughters are calving and are outstanding.

Journeyman was our second 5L Craftsman ET son that we purchased in 2024. He will add a performance and middle, is very easy going and has consistent calves. As with his brother, we feel the females will be outstanding out of this bull.

We were looking through the bulls at Ohlde Cattle Company and saw two bulls that really stood out to us. This is the first one, He combines OCC Home Run and a great line of Black/Red Gene cows. He was the growthiest bull in the pen and had good bone and structure. We've liked his calves very well to this point.

Kaycee 610K was our second pick at OCC, He is heavy muscled and has a little more slope to his hip that I like, there will be no high tail heads from him! He has a great attitude and is backed by a very nice cow. He got a few good red cows, but was used extensively on our Black OCC cows to add some Black / Red Gene, straight OCC cows to our herd.

Maximus was retained from his calf crop because he was the best footed bull in his class and was out of one of our top cows who is the deepest bodied cow on the ranch and being sired by Flying K May, who is a top maternal bull. He has grown larger than either parent and sires extra frame, length and extension while passing on his great feet.

COMMERCIAL HEIFERS

This year we are offering a group of commercial first calf pairs in addition to the commercial replacement heifers. These heifers are owned and raised by Wyckoff Cattle from Cheraw, Colorado, Steve and Matt Kalous from Brush, Colorado and Lucas and Maureen Beek from Cheyenne Wells, Colorado.

Each lot of heifers will come into the ring in small groups, sorted by weight and type. The buyer will buy the group in the ring or has the option of taking the whole lot. We would allow a young person to pull one heifer out if they are wanting to find a show heifer.

We believe this is a great group of commercial females that will make their new owners proud. The commercial heifers will follow the bulls at the conclusion of the sale. The bulls will start at 1:00 P.M.

LOT A: Wyckoff Cattle, JD Wyckoff - Cheraw, Colorado (580) 247-8154

Wyckoff Cattle is offering 10 first calf pairs.

These heifers originated from the Pat Shannon ranch in Kim, Colorado, some were home raised, and some were from Steve Kalous heifers.. They are straight Red Angus from a top commercial herd. The heifers were vaccinated in the fall and had Cleanup 2 on February 26th. The calves received a shot of 7 Way at birth. The calves are sired by Axtell Action and Cube sons both from the Axtell 785 cow, locking in uniformity. The calves were born mid February. This is a rare opportunity to purchase first calf pairs of top genetics. This lot allows you to get income quickly and still be left with a good young cow and the work of calving heifers is already done.

LOT B: Steve and Matt Kalous – Brush, CO (970) 768-2451

Steve and Matt are offering 15 head of replacement heifers.

These heifers are born in January and February and are out of a high performance / maternal cattle herd. They will have extra size and weight and will make top cows. They are sired many past sale toppers from our herd. They will be mostly by Flying K Max, Red Knight, Dominator, Knock Out and Redwing sons. They buy the good ones and it is evident in the quality of their cattle. If you want to tie into top genetics, look at these girls. I would call this group, one of the best sets of cattle to sell in the state this spring. These heifers are weighing in the 800 lb. range, but are moderate framed and backed by generations of similar type. Please call Steve to discuss these heifers. He has documented carcass data on their steer mates that will make your mouth water. Just an outstanding group of heifers!

LOT C: Beek Family – Cheyenne Wells, CO Lucas (719) 342-1005 or Maureen (719) 342-2969

The Beek family – Lucas and Maureen Beek are offering 15 head of replacement heifers.

These heifers are born in April and are from a maternal cattle herd that doesn't pamper their cattle. These cattle will know how to go out and work for a living. These heifers are all April born heifers and will really pop when they get out on grass. They are sired by Axtell and Kravig Red Angus bulls. They will be a nice set of cattle from a really good family that has a passion for good cattle. The Beek's also have a beef business, so contact them for that as well. These heifers are weighing in the 600-650 lb. range, are moderate framed and backed by a quality cowherd. Please call Lucas or Maureen to discuss these heifers.

Please note that NO DELIVERY will be available on commercial heifers.

Pictured are the 2018 consignment by Steve and Matt Kalous. For this year's consignments, check out videos on DVAuction.com

Lot 1

We lead off the sale with a bull that is built like a tank, stacking muscle and capacity from Red Boxer and Widescreen. This bull packs about as much as you can onto his frame. He is the much anticipated first Red Boxer son to sell. 5204 is the bull to use if you want to increase capacity, muscle, gainability and maternal ability. He will produce the front pasture kind.

Lot 2 is the first of Clay's bulls. He earned his way to the top of the offering with ratios of 114 for weaning and yearling. He is very long, smooth and deep. He is a prototype of the kind I like. His dam has arguable the best udder in the herd at ten years of age. This bull will make stylish calves that grow and make outstanding daughters.

HEIFER BULL

Lot 3 is extremely similar to Lot 2 in type, you can see how Widescreen 2032 stamps his progeny. This one may be even smoother, has a great attitude and is a heifer bull. Either Lot 2 or Lot 3 is the best Widescreen we've had to date, I just can't decide which one it is. Lot 3 is from one of our original cow families that is great at calving ease and longevity as noted by his Top 1% HB and Stay.

5012 is the first Craftsman 3620 son to sell. He has the same build as his sire, but packs more depth and thickness onto his frame. He is a calving ease bull and goes back to a good cow family and a very hard working dam. A great combo of calving ease, thickness and maternal ability here!

EPD	81	56	25	14	-4.5	46	72	25	9	7	19

I rarely say a 82 lb bull is a heifer bull, but his numbers indicate a heifer bull. He was tall and narrow at birth. More of a missile instead of a cinder block. He will work on heifers in my opinion. If you choose to use him on cows, he will handle that just as well. He will add some frame and should produce long lasting females.

All registered bulls have been sire verified and genomic tested using GGP-LD (100k). This level of accuracy is equivalent to 15-20 progeny records.

This dark red bull is another of the flashy, thick made Boxer sons. He should work on heifers and is out of a super low BW cow. You may notice her udder ranking. She had a good udder throughout life, but lost a quarter last year at 10 years of age, therefore the lower ranking. There's a lot of longevity in this bulls pedigree.

This heifer bull is ranked high for calving ease and maternal traits and goes back to some excellent cows in his pedigree. I think this bull will be one of the better heifer bulls to sell and is one to keep the daughters from as the cows behind him are all top notch.

We typically would not keep a bull with a 47 lb BW, but when we were sorting keepers, this bull was as good as any from the first calvers and I didn't realize he was so small at birth. He has held his own and will be a little smaller framed. Note that his dam calved with a smaller calf two weeks early this year to be our first calver. This bull is likely to be a short gestation, sleep all night and all day heifer bull!

We have a SENIOR!

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM.... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

RED ANGUS
